WHOLE FARM WATER TREATMENT SYSTEM BY PROXY-CLEAN® PRODUCTS

The Agrow-Clean™ System is designed to treat any size farm. The system is a combination of a high volume peristaltic pump(s), pulse output water meter and Proxy-Clean® Product's trusted water treatment chemicals.

VERSATILITY

- Works with any existing pulse output water meter
- Doesn't lose prime when in standby mode or when changing chemicals
- Lockable programming with password protection
- Easy on/standby mode
- No vapor lock and suitable for off gassing applications. Pump is also not affected by back pressure
- Anti-Siphon design
- Can treat up to 315,000 gallons per day

RELIABILITY

- Water and UV resistant, and it meets IEC specification IP65.
- Rated for outdoor use. Built to NEMA 4X specifications
- Heavy duty splined shaft
- Brushless motor with ball bearings rated for long-term use
- Built-in leak detection

AFFORDABILITY

- Treat multiple barns with only 1 pump
- Run multiple pumps/chemicals off of 1 water meter
- Reduced labor cost by not having to continually make stock solutions
- Precise chemical metering from 1-100PPM to prevent unnecessary chemical usage
